

80% of all equipment in the USA is leased.

Seon understands the challenges of stretching a diminishing budget. In order to help, Seon now offers a leasing program exclusively through Alliance Funding Group (AFG). Now you can have the latest technology while receiving the best support in the industry.

Most transportation administrators have learned to budget year-by-year, appropriation-by-appropriation and grant-by-grant, with spending horizons that rarely cross over fiscal periods. If an item is not in the budget, many companies simply can't make the purchase, no matter how critical the need. However, there is another way – Seon Financing. It is easy to lease or lease-to-own essential new equipment and pay monthly, quarterly or annually.

Benefits:

- Protects you from obsolete technology
- Equip or update your whole fleet at the same time
- Improves cash flow through 100% financing
- Assists with tax management
- Helps with off balance sheet considerations
- Puts you in control of your budget
